

**Whether or not the Government will choose to bleed the country completely dry is as headline grabbing as ever.**

**Whether or not you choose to let it bleed *you* dry is quite another matter.**

**It is time to look forward, deal with the issues that are out there and make plans for what is bound to be an environment where keeping hold of what you earn or what you own will become more difficult. The Government has already told us tax rates are increasing, why wait for the inevitable?**

**Farming and land based business is rife with complication and advisers who don't really understand the sector or the people in it. It is an amazing coincidence just how many have suddenly become experts in this sector now other lines of work have dried up!**

**Chavereys is recognised as one of the UK's leading experts in the fields of agriculture, horticulture and landed estates. This is our sector, we have invested in the best and our team is recognised as such. Unlike most firms we are still expanding because people recognise the costs of not getting it right are just too high.**

**It is why in 2008 we led the debate on depreciation in stock and secured agreement with HMRC that has saved the farming industry millions of pounds. It is why other professionals come to us when businesses need restructuring or assets are going to be disposed of.**

**We have access to experience, wisdom, case law and schemes that others simply don't have.**

**An initial visit and discussion costs you nothing, please contact Martyn Crawley, Henry Mullens or Nick Holmes.**
